

SN 10/629,984  
Docket No. S-100,648  
In Response to Office Action dated 04.21.05

## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

### LISTING OF CLAIMS:

1. (Currently amended) A composition comprising a solid resin support having a ~~multifunctional~~trifunctional chemical moiety covalently attached thereto at a resin attachment site, said trifunctional ~~multifunctional~~-chemical moiety including hydrophobic membrane anchoring groups as one functionality thereon.
2. (Cancelled) The composition of claim 1 wherein said multifunctional chemical moiety is a trifunctional chemical moiety.
3. (Currently amended) The composition of claim 1 wherein said trifunctional ~~multifunctional~~-chemical moiety comprises an amino acid derivative including alkyl side chains thereon, and a reactive arm group selected from the group consisting of amino, carboxyl and sulfhydryl covalently attached to said resin attachment site.
4. (Currently amended) The composition of claim 2 1wherein said trifunctional chemical moiety comprises an amino acid derivative including alkyl side chains thereon, a reactive group selected from the group consisting of amino, hydroxyl, carboxyl and sulfhydryl thereon and a reactive arm group selected from the group consisting of amino, carboxyl and sulfhydryl covalently attached to said resin attachment site.
5. (Withdrawn) The composition of claim 3 wherein said reactive group includes a protecting group thereon.

SN 10/629,984  
Docket No. S-100,648  
In Response to Office Action dated 04.21.05

6. (Withdrawn) The composition of claim 3 wherein said reactive arm group is an amino group covalently attached to said resin attachment site.

7. (Original) The composition of claim 3 wherein said reactive arm group is a carboxyl group covalently attached to said resin attachment site.

8. (Original) The composition of claim 3 wherein said amino acid is selected from the group consisting of glutamic acid, lysine, serine, homoserine, aspartic acid, and cysteine.

9. (Withdrawn) The composition of claim 3 wherein said protected reactive group includes a protecting group selected from the group consisting of Fmoc, and Boc.

10. (Original) The composition of claim 1 wherein said solid resin support is selected from the group consisting of ceramics, glass, latex, crosslinked polystyrenes, crosslinked polyacrylamides, natural polymers, gold, colloidal metal particles, silica gels, aerogels and hydrogels.

11. (Withdrawn) A method of covalently attaching a multifunctional chemical moiety to a solid resin support comprising:

reacting a multifunctional chemical moiety comprising an amino acid derivative including alkyl side chains thereon, a reactive group selected from the group consisting of amino, hydroxyl, carboxyl and sulfhydryl thereon and a
